

CLEANERS No. 14 LIQUID RUST REMOVING LAUNDRY SOUR

GENERAL DESCRIPTION:

CLEANERS No. 14 is designed to completely neutralize linen being washed so that the pH of the finished product is within an acceptable range of the skin pH, thus preventing alkaline or acidic irritation to the skin. No. 14 reduces rejects by aiding in removing residual alkali and mineral deposits, such as lime and iron which cause graying and yellowing of linen.

DIRECTIONS FOR USE:

CLEANERS No. 14 should be added during the final rinse cycle of the formula with a 90 degree to 120 degree water temperature and a low water level. Using the product at 2 to 4 ounces per hundred pounds of work will deliver the proper pH. A pH indicator may be used to check the correct level of sour for various loads. Different fabrics may require different levels of sour. For example, towels retain more alkali than sheets and would require more sour. The optimum pH is 5.5 to 6.5

HANDLING PRECAUTIONS:

CAUTION: WARNING: KEEP OUT OF REACH OF CHILDREN.

Acidic Liquid. Contact with skin and eyes may cause severe irritation. Harmful if swallowed. Flush with water if splashed in eyes for 15 minutes and consult physician immediately. If ingested, drink large amounts milk, milk of magnesia or gelatin, or if these are not available, drink large amounts of water. DO NOT induce vomiting. Obtain prompt medical attention.

PHYSICAL PROPERTIES:

Alkalinity neutralizing agents Chemical Composition: Stability: 12 months @ Ambient Temperature Appearance:.... Clear Liquid pH of 1% solution:.... 3.4 pH..... 2.1 1.016(8.46 lbs/gal) Specific Gravity.... Penetration: **Immediate** Biodegradable: Yes None Foam:

PACKAGING:...... 5 gal plastic pail / 15 & 55 gal plastic
